

# HYDROLOGICAL SERVICES PTY LTD

## STAFF GAUGE PLATES

Staff Gauge Plates are primarily used to measure the depth of streams or rivers.

They are made from aluminium, stove baked enamel, screen printed legend, in 1 metre lengths by 130mm wide, to Australian Standard markings.

Gauge plates can be either:

- Flat, without metre numbers, part number GPF  
(Note: 5 pairs of 10 mm diameter holes are provided for fixing plate to backing board).
- Flat, with numbered metres, part number GPFN  
(Note: 5 pairs of 10 mm diameter holes are provided for fixing plate to backing board).
- Half round (for clamping on 80mm pipe or pole), without metre numbers, c/w 3 clamps, part number GPR
- Half round with numbered metres, c/w 3 clamps, part number GPRN
